

noah de guzman

UX/UI Designer with 2+ years delivering shipped enterprise products. An out-of-the-box thinker driven by curiosity, collaboration, and passion.

EXPERIENCE

SAP, Vancouver, BC — UX Designer

November 2025 - Present

- Applied design thinking principles to own UI/UX for admin settings across **3 enterprise software products**, collaborating with PMs and developers to unify **20 tabs** into a single, consistent pattern.
- Designed and documented **5+ reusable UI components** with usage guidelines, delivering **Figma specs and developer handoff** to support visual consistency and scalability across teams.
- Used **AI tools** to accelerate design workflow exploration, developing a **Claude AI workshop** that drove adoption across the design org, demonstrating curiosity and a drive to challenge the norm.
- Crafted engaging design narratives and presentations to communicate decisions to cross-functional collaborators and stakeholders

Nokia, Ottawa, ON — UX Designer

January 2025 - August 2025

- Led **end-to-end redesign** of the Frostbuster tool, defining user interaction and information hierarchy to remove **12 steps** and reduce **clicks by 35%** through a single guided experience.
- Conducted user research with **33 developers and 3 interviews**, gathering and analyzing feedback to iterate design solutions within tight delivery timelines.
- Collaborated transparently with developers user flows and prototypes to balance technical feasibility and product quality.

Invoke, Vancouver, BC — Product Designer

May 2024 - August 2024

- Adapted Toyota's car rental reservation experience across **8 screens**, applying user-centered design methods to ensure a familiar, intuitive experience.
- Owned the UX redesign of Toyota's internal fleet management software across **9 flows and 2 features**, presenting and communicating design decisions to stakeholders in bi-weekly reviews.
- Conducted heuristic evaluations across **3 portals and 26 flows**, identifying **64 usability violations** and delivering **6 prioritized recommendations** balancing user needs and business goals.
