WORK EXPERIENCE

UX Designer – SAP

November 2025 - July 2026

- Applied interaction design principles to define and own UX for admin settings across **3 enterprise products**, collaborating with PMs and engineers to unify **20 tabs** into a single, consistent pattern.
- Designed and documented **5+ reusable components** with usage guidelines, delivering Figma specs and developer handoff to support scalability across teams.
- Leveraged GenAI to accelerate design exploration, developing a **Claude AI workshop** that drove adoption across the design org.
- Communicated design rationale and storytelling through presentations to cross-functional stakeholders, translating decisions into shared understanding.

UX Designer – Nokia

January 2025 - August 2025

- Led end-to-end interaction design for the Frostbuster tool, defining user flows and information hierarchy to remove **12 steps** and reduce clicks by **35%** through a single guided experience.
- Conducted user research with **33 participants and 3 interviews**, translating insights into iterated design solutions within tight delivery timelines.
- Partnered with engineers on flows and prototypes to balance technical constraints with product quality.

Product Designer – Invoke Co.

May 2024 - August 2024

- Designed Toyota's car rental reservation experience across **8 screens**, applying user-centered methods to deliver a familiar, intuitive consumer-facing product.
- Owned UX redesign of Toyota's internal fleet management software across **9 flows and 2 features**, communicating design decisions to stakeholders in bi-weekly reviews.
- Conducted heuristic evaluations across **3 portals and 26 flows**, identifying **64 usability violations** and delivering **6 prioritized recommendations** balancing user needs and business goals.
