SUMMARY

UX designer with 2+ years of experience across SAP, Nokia and Invoke, designing enterprise and consumer products from research to developer handoff. Experienced in design systems, interaction design, and prototyping.

WORK EXPERIENCE

UX Designer, SAP

November 2025 – July 2026

- Designed admin settings UX across **3 enterprise products** in SAP Business Data Cloud, partnering with a fellow UX designer, PMs, and engineers to unify **20 tabs** into a single, consistent pattern.
- Contributed to **SAP's DNA Web UI Kit design system** for 3 products: rebuilt components with design tokens, variants and accessibility annotations, and wrote usage documentation and page templates.
- Co-led a **Claude AI workshop** and co-wrote the setup guide and video, driving GenAI adoption across the design org.
- Presented specs and design rationale in reviews with the UX lead, senior designer, and development lead, structuring specs so distributed dev teams could implement without working in the Figma file.

UX Designer, Nokia

January 2025 – August 2025

- Drove interaction design for the Frostbuster redesign alongside a UX researcher, defining user flows and information hierarchy that removed **12 steps** and cut clicks by **35%** through a single guided experience.
- Surveyed **33 developers** and interviewed **3 users**, then ran workshops with developers and reviewers to iterate on designs within a 5-week timeline.
- Partnered with engineers on flows and prototypes to balance technical constraints with product quality.

Product Designer, Invoke Co.

May 2024 – August 2024

- Designed the mobile version of Dolan Toyota's car rental reservation flow across **8 screens**, adapting the desktop experience into a familiar, intuitive consumer-facing product.
- Prototyped the UX redesign of Toyota's internal fleet management tool across **9 flows and 2 features** with a senior product designer, presenting design decisions to the client in bi-weekly reviews.
- Conducted heuristic evaluations across **3 portals and 26 flows**, identifying **64 usability violations** and delivering **6 prioritized recommendations** balancing user needs and business goals.

EDUCATION

Simon Fraser University, BSc Interactive Arts and Technology, Design Concentration · 2025
Google UX Design, Coursera · 2023

VOLUNTEER

Playtester, Electronic Arts (EA) · April 2023 – present

SKILLS

UX/UI design: Interaction Design, User Flows, Wireframing, Prototyping, Design Systems, Personas, Journey Mapping
User research: User Interviews, Surveys, Usability Testing, Workshops, Competitive Analysis, Heuristic Evaluation
Tools: Figma, GenAI tools (Claude), HTML/CSS/JS
Other: Game Design, Web Design, 3D Modeling, Animation
